DETAILED ACTION

This Office Action is in response to Applicant's Amendment dated 04/08/2005.

Oath/Declaration

Oath/Declaration filed on 10/04/2003 has been considered.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "organic light emitting diodes" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2813

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Specification should be corrected to support limitation of original claim 17 of "organic light emitting diodes".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. **Claims 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Klausmann et al. [US 2004/0051449].**

► With respect to claim 17, Klausmann et al. (fig. 1, text pages 1-4) discloses the claimed organic light emitting panel comprising:

a substrate (101), having organic light-emitting diodes (text paragraph [0003] & [0005]);

a cover plate (110), over the substrate (text paragraph [0006]);

a patterned desiccant (114), on the cover plate, facing to the substrate (text paragraph [0007]; and

an adhesive frame (112), between the substrate and the cover plate (text paragraph [0005]).

► With respect to claim 18, the patterned desiccant (114) would be continuous, discontinuous, solid, hollow, or the combination thereof.
